HARRISON AND SONS,
PRINTERS IN ORDINARY TO HIS MAJESTY,
ST. MARTIN'S LANE.
The present part of "Hieroglyphic Texts from Egyptian Stelae, etc., in the British Museum," contains copies of all the inscribed monuments of the first eleven dynasties which are exhibited in the Vestibule and Northern Egyptian Gallery.

The greater number of the texts are funerary in character, and their importance is great, for they illustrate the burial customs which were current under the Ancient Empire. They also enumerate the principal tomb festivals, and supply a large number of the civil and priestly titles, and useful lists of the canonical offerings of the dead. Incidentally some of these texts contain information of the highest historical value. Thus the information obtained from the inscription of Ptah Shepses (No. 30) has been employed in determining the order of the succession of several kings of the IVth and Vth dynasties; and the stele of Antef (No. 99) supplies the names of three successive kings of the XIth dynasty, the order of whose reigns was, up to the time of its discovery, unknown.

Owing to the great difference in the sizes of the various objects, it has been found impossible to adopt a uniform scale in the drawings published herein.

The drawings, copies of the texts, and the descriptions of the plates are the work of Mr. P. D. Scott-Moncrieff, M.A., Assistant in the Department.

E. A. WALLIS BUDGE.

Department of Egyptian and Assyrian Antiquities,
British Museum.

November 29th, 1910.
DESCRIPTION OF THE PLATES.

The numbers of the objects which are not within brackets are the exhibition numbers, as given in the Guide to the Egyptian Galleries (Sculpture), London, 1909. Those which are within brackets are registration numbers.

In the measurements the first figures represent the height, and the second the width.

PLATE I.

[No. 35021.] Small white limestone stele, broken at the edges and flaked on the surface. The hieroglyphs are scratched on the stone in thin wavy lines. There are traces of some kind of drawing inside the "palace" sign. Early dynastic period. 1 ft. 8 in. × 9½ in. From Abydos.

Presented by the Egypt Exploration Fund, 1900.

[No. 35017.] Small white limestone stele, with artificially rounded top. The edges are broken, and the surface is flaked in places. The two hieroglyphs are in relief. Early dynastic period. 1 ft. 6½ in. × 6 in. From Abydos.

Presented by the Egypt Exploration Fund, 1900.

[No. 35020.] Fine white limestone fragment, with artificially rounded top. The hieroglyphs are in relief. Early dynastic period. 8½ in. × 7 in. From Abydos.

Presented by the Egypt Exploration Fund, 1900.

[No. 35019.] Fine white limestone fragment, with artificially rounded top. The hieroglyphs are in relief. Early dynastic period. 7½ in. × 9 in. From Abydos.

Presented by the Egypt Exploration Fund, 1900.

PLATE II.

[No. 35613.] Coarse limestone stele. The hieroglyphs are in relief. The surface is considerably weathered. Early dynastic period. 1 ft. 3 in. × 9 in. From Abydos.

Presented by the Egypt Exploration Fund, 1901.

[No. 35614.] Coarse limestone stele. The whole surface is severely weathered, and only one sign remains visible. Early dynastic period. 1 ft. 6 in. × 11½ in. From Abydos.

Presented by the Egypt Exploration Fund, 1901.

[No. 35612.] Coarse limestone stele, with rounded top. The hieroglyphs are in relief. The whole surface is severely weathered. Early dynastic period. 1 ft. 10 in. × 10 in. From Abydos.

Presented by the Egypt Exploration Fund, 1901.

[No. 35018.] Small white limestone stele, with artificially rounded top. The edges of the lower part are broken and part of the surface is flaked. The hieroglyphs are in relief. Early dynastic period. 1 ft. 5½ in. × 9 in. From Abydos.

Presented by the Egypt Exploration Fund, 1900.
PLATE III.

No. 2. Red sandstone fragment, bearing part of a figure of a king, who wears the red crown and is represented in the attitude of smiting a foe. In the centre is the Horus name of the king, the reading of which is, with little doubt, Sa-nekht. To the right, under a standard, is part of the word Maspot, an allusion to the turquoise land of Sinai. The figure and hieroglyphs are in relief. IIIrd dynasty. 1 ft. 1 in. x 1 ft. 7 in. From Wadi Maghabah, Peninsula of Sinai.

Presented by the Egypt Exploration Fund, 1905.

No. 5. Limestone panel of Suten-ābu, a royal kinsman and priest of Hathor. The deceased is represented wearing a leopard skin about his loins and the magical knot slung over his left shoulder. The features and limbs are peculiarly heavy, but the carving and workmanship are good. Both figure and hieroglyphs are in relief. A large hole has been drilled through the stone. IIIrd dynasty. 2 ft. 5 in. x 1 ft. 8 in. From Denderah.

Presented by the Egypt Exploration Fund, 1898.

No. 6. Small limestone false door of Suten-ābu. Well and clearly carved. IIIrd dynasty. 1 ft. 8 in. x 1 ft. 4 in. From Denderah.

Presented by the Egypt Exploration Fund, 1898.

No. 1. Limestone panel from the tomb of Sherā (B. 3. Mariette, Mastabas), a priest of the cult of King Sent (IIIn dynasty). The figures and hieroglyphs are in relief, and are well and clearly carved. After the IIIn dynasty. 4 ft. 9 in. x 1 ft. 7½ in. From Sakkarah.

PLATE IV.

No. 8. Limestone false door of Ka-nefer, son of Seneferu, and overseer of the priests connected with the cult of his father. The list of other offices that he held is representative of the hierarchy and bureaucracy of the Ancient Empire. The hieroglyphs are incised and the figures are in relief. The workmanship is fine and the whole is in good preservation, with the exception of the extreme lower portions. IVth dynasty. 8 ft. 8 in. x 4 ft. From the necropolis of Memphis.

PLATE V.

No. 9. Limestone slab from the tomb of Ka-nefer, in the form of a hatep offering. The hieroglyphs are incised. The stone is slightly weathered, especially in the lower left-hand corner. IVth dynasty. 1 ft. 2 in. x 3 ft. 3 in. From the necropolis of Memphis.

No. 26. Limestone jamb, probably from the side of a door, from the tomb of Thethā. State of preservation good. The hieroglyphs are incised. IVth dynasty. 7 ft. 10 in. x 7 in. Published: Lepsius, Auswahl, 8; Sethe, Urkunden, I. 1, p. 15. From the necropolis of Memphis.

PLATE VI.

No. 24. Limestone false door of Thethā, a privy councillor and overseer of the guard of the pyramid of Khafra. With him are represented his wife, who bears the peculiar name of Tēbti (i.e., the “cow hippopotamus”), and smaller figures of their children. The whole is in good preservation except the head and shoulders of the standing figure of Thethā. The lower part of the right-hand panel, containing the nether part of the figure of Tēbti, is missing. The figures and the hieroglyphs are in sunk relief: the latter are cut in detail. Technique and workmanship good. IVth dynasty. 8 ft. x 5 ft. 3 in. Published: Lepsius, Auswahl, 8. From the necropolis of Memphis.
PLATE VII.

No. 25. Corresponding false door of Thethâ and Êebt. This one is not in such good preservation as the other, and more parts are missing. The surface is considerably weathered, but on the upper part there are frequent traces of red, black (or dark blue), and yellow paint, these being especially noticeable on the small false door in the upper left-hand corner and on the centre scene. Technique and workmanship same as foregoing. IVth dynasty. 8 ft. × 5 ft. 10 in. Published: Lepsius, Auswahl, 8. From the necropolis of Memphis. [157 A]

PLATE VIII.

No. 31. Sandstone false door of Khennu, a priest connected with the cult of Menkaurâ. Both the hieroglyphs and figures are in relief. The upper part of the false door is incomplete, and seems to have suffered from the action of water. The technique is good considering the coarseness of the stone. (This false door is probably not from the tomb of Khennu mentioned in Mariette, Mastabas, p. 184.) IVth dynasty. 6 ft. 2 in. × 3 ft. 7½ in. From the necropolis of Memphis. [1272.]

No. 7. Sandstone false door of Mert-tesf and her two daughters. The figures and hieroglyphs are in sunk relief. Good workmanship. The figures are somewhat unusually slender. IVth dynasty. 4 ft. 2 in. × 1 ft. 5 in. From the necropolis of Memphis. [1228.]

PLATE IX.

No. 15. White limestone false door of Katep, a priest of the cult of Khufû. The hieroglyphs, which are carved in detail, and the left-hand figure of the deceased, are in sunk relief. The right-hand figure and the signs forming the name "Katep," immediately above it, are in raised relief. Good technique and workmanship. IVth dynasty. 3 ft. 11 in. × 2 ft. 11 in. From the necropolis of Memphis. [1288.]

No. 16. White limestone slab from the tomb of Katep. The lower right-hand corner is broken away. The figures and hieroglyphs are in sunk relief. IVth dynasty. 11 in. × 2 ft. 2 in. From the necropolis of Memphis. [1173.]

No. 17. Limestone slab from the tomb of Katep. The centre portion is sunk at a lower level than the side panels. The work appears to be unfinished; the name of a god is missing at the foot of the right-hand panel, and the centre panel was probably intended to bear a scene. The orthography of the inscription on the former is peculiar. Two of the bird signs are without legs, possibly for magical reasons. IVth dynasty. 1 ft. 8 in. × 2 ft. 9 in. From the necropolis of Memphis. [1174.]

PLATE X.

No. 66. Limestone architrave, from the tomb of Uash-Ptah. The first line of the inscription is wanting and also the first part of the four existing lines (see Mariette, Mastabas, p. 268). The hieroglyphs are deeply incised and the figure is in sunk relief. Good workmanship. IVth or Vth dynasty. 1 ft. 3 in. × 5 ft. 10 in. From Saâkârah. [1278.]

No. 32. Limestone architrave, from the tomb of Ptah-Shepses, with four lines of deeply incised hieroglyphs cut in full detail, containing the usual funerary prayer of the period. On the left is a seated figure of the deceased, in deeply sunk relief. Fine technique, and in perfect preservation. IVth or Vth dynasty. 2 ft. 2½ in. × 13 ft. 6 in. From Saâkârah. [683.]

DESCRIPTION OF THE PLATES.
PLATE XI.

No. 32. Left-hand panel of the limestone façade of the tomb of Ptaḥ-Shepses. The stone is painted a deep pink colour, and the hieroglyphs, which are deeply sunk, are coloured green. The upper part of this side of the façade is missing. Fine technique and workmanship. IVth–Vth dynasty. 8 ft. 2 in. x 5 ft. 3 in. From Ṣaḥkrāraḥ. [682.]

PLATE XII.

No. 32. Limestone false door, forming the centre of the tomb-façade of Ptaḥ-Shepses: colouring, technique, etc., the same as the foregoing. The text contains principally the religious offices held by the deceased. An unusual piece of orthography is the sign ḫef used to represent the god Osiris. 8 ft. 2 in. x 3 ft. [682.]

PLATE XIII.

No. 32. Right-hand panel of the tomb-façade of Ptaḥ-Shepses: colouring, technique, etc., the same as the foregoing. About one foot of the upper part of this side is missing. The text is mainly biographical, and relates how the deceased was brought up in the royal harim of Menkauır and, later, in that of Shepseska. He married ḫi-ỉma-t, a daughter of the latter king. The signs in brackets are restored from Mariette. Published: de Rougé, Inscriptions, pp. 79, 80; Mariette, Mastabas, pp. 112, 113; Sethe, Urkunden, l. i, pp. 51–52. (N.B.—Plates 11, 12, and 13 form a continuous whole, the panels having been divided into separate plates for greater convenience.) 9 ft. x 3 ft. 5 in. [682.]

PLATE XIV.

No. 44. White limestone stele, in the form of a false door of Afa, a superintendent of the royal palace, and overseer of the gardeners. Both the figures and hieroglyphs are in relief. IVth dynasty. 2 ft. 2 in. x 2 ft. 4 in. From the necropolis of Memphis. [130.]

PLATE XV.

No. 65. Limestone stele, in the form of a false door of Ka-utč-ančh, district chief of the Aphroditopolitan nome, captain of the king’s guard and overseer of the cattle belonging to the guard of the court. The figures and offerings in the upper scenes are carved in relief. The hieroglyphs are sunk and cut in detail. IVth dynasty. 3 ft. 11 in. x 2 ft. 11 in. From the necropolis of Memphis. [1223.]

No. 18. Limestone stele, in the form of a false door of Shesĥa, surnamed Nefer-sesem-Khufu, and his wife Khenti-Ka. It is possible, however, that Nefer-sesem-Khufu may be the second husband of Khenti-Ka; but the titles, “royal scribe and comptroller of the priests,” being the same in both cases, imply that the two names refer to the same individual. Both figures and hieroglyphs are in sunk relief. Good workmanship. IVth dynasty. 4 ft. 3 in. x 2 ft. 4 in. From the necropolis of Memphis. [1282.]

PLATE XVI.

No. 42. Fine white limestone stele, from the tomb of Ari and Ant. The figures and hieroglyphs are in relief; the latter being cut in detail. The wigs of both the deceased persons are painted black, and the eyes are picked out in the same colour, but there seem to be no other traces of colouring. Fine technique and workmanship. IVth dynasty. 2 ft. 4 in. x 2 ft. 1 in. From the necropolis of Memphis. [1171.]
No. 43. Fine white limestone panel of the royal libationer, **Åri**. The deceased is represented as wearing a closely plaited wig, the leopard skin, and over his shoulder the magical knot. Round his neck hangs a bead necklace. With him are five smaller figures of his sons. The figures and hieroglyphs are in relief. **Åri**'s wig is painted black, and the eyes are picked out in the same colour. Fine technique and workmanship. IVth dynasty. 3 ft. x 1 ft. 7 in. From the necropolis of Memphis. [1168.]

No. 73. Fine white limestone panel of **Ant**, companion to the foregoing. The wig of the deceased is painted black, and is bound with a fillet; round her neck hangs a cluster of long beads. Facing her are three daughters and a son. The figures and hieroglyphs are in relief. Fine technique and workmanship. IVth dynasty. 3 ft. 5½ in. x 1 ft. 8 in. From the necropolis of Memphis. [1170.]

**PLATE XVII.**

No. 41. Fine white limestone panel of **Åri**. In this case the figure of the deceased is painted red, the skirt white, and the plaited wig black. There are also traces of paint on the hieroglyphs. Both the figure and signs are in relief. It will be noticed that in this and the foregoing panels the name of **Åri** is spelt in no less than three different ways. Fine technique and workmanship. IVth dynasty. 3 ft. 9 in. x 1 ft. 7 in. From the necropolis of Memphis. [1169.]

No. 47. Limestone false door from the tomb of **Re-mu** and **Thentet**. Only the upper scene and part of the side panels remain. The hieroglyphs and figures are in sunk relief. Good workmanship. IVth dynasty. 4 ft. 8 in. x 2 ft. 6½ in. From the necropolis of Memphis. [528.]

**PLATE XVIII.**

No. 45. Limestone false door of **Ānkth-khāf**, a scribe of the treasury, and his wife, **Nefer-Setchemt**. Both hieroglyphs and figures are in sunk relief. Workmanship good, but in poor preservation. Several blocks are missing. IVth dynasty. 5 ft. 2 in. x 3 ft. 6 in. From the necropolis of Memphis. [527, 529, 530.]

No. 45. Rounded block from the same tomb. The figure and hieroglyphs are in sunk relief. 1 ft. 10 in. x 10 in. [535.]

**PLATE XIX.**

No. 62. Part of a fine white limestone stele of a “Chancellor of the House of Eternity.” The upper part is divided into fifteen rectangular spaces, each containing the name of a funerary vase or piece of furniture. The hieroglyphs are in relief and are very finely carved. Fine technique. Probably IVth dynasty. 3 ft. 7 in. x 2 ft. 1 in. [1277.]

No. 62. Fragmentary inscription on side of the same stele. [1277.]

**PLATE XX.**

No. 40. Fine white limestone panel from the tomb of **Rā-ḥetep**. Both the figure and the hieroglyphs are carved in the most delicate relief; the latter are cut in full detail. In the list of offerings facing the deceased there figure a stone-headed arrow and an object like a long-handled mace. The wig of the deceased was painted black, and, apparently, both his body and his robe were coloured red; the colours have faded considerably. The robe is cut like a woman's about the legs: there is no indication of its shape on the body. Very fine workmanship. IVth dynasty. 2 ft. 7 in. x 3 ft. 9 in. From Mėdūm. [1242.]

B
No. 23. Limestone rounded block, from the tomb of Rutchek, a priest of the cult of Khafra and of the king's pyramid. The hieroglyphs are in sunk relief. Good workmanship. IVth dynasty. 11 in. x 3 ft. 6 in. From the necropolis of Memphis. [1268.]

No. 22. Limestone block from the same tomb. The hieroglyphs are incised, but the stone has been considerably weathered. IVth dynasty. 5 in. x 2 ft. 3 in. From the necropolis of Memphis. [1269.]

PLATE XXI.

No. 67. White limestone cone of the Kher-heb priest and "superintendent of the caravan (?)" Khu. The hieroglyphs are in sunk relief. Probably IVth dynasty. 1 ft. 6 in. high. From the necropolis of Memphis. [199.]

No. 39. Limestone fragment, containing part of three columns of the funerary inscription of a smur wât, kher heb, and privy councillor. Ancient Empire. 1 ft. 2 in. x 8 in. [992.]

No. 46. Part of a small limestone false door. The hieroglyphs are incised, and the figures cut in sunk relief. The stone is in very bad condition, and has been severely weathered. Probably IVth dynasty. 2 ft. 2 in. x 1 ft. 7 in. [531.]

No. 4. Coarse limestone panel, from the tomb of Hes. The hieroglyphs are archaic in form and carved in relief on a sunk ground. IIIrd dynasty. 10\(\frac{1}{2}\) in. x 1 ft. 6 in. From Saqqârah. [1212.]

PLATE XXII.

No. 63. White limestone false door of Uash-ka, his wife Tchefatsen, and other members of his family. The hieroglyphs and figures are in sunk relief. Good technique and workmanship. Vth or VIth dynasty. 5 ft. x 1 ft. 10 in. From the necropolis of Memphis. [1156.]

PLATE XXIII.

Limestone altar of Uash-ka and Tchefatsen. In the centre is a hetep object in low relief on which can still be traced the outline of two shapes of bread and a libation pot. On either side is a sunk trench for libations and lower on the left is a circular object, perhaps representing a deep trench into which blood was run. The figures and hieroglyphs below are in sunk relief. Vth or VIth dynasty. 1 ft. 2 in. x 3 ft. 6 in. [1156.]

PLATE XXIV.

No. 53. Limestone false door from the tomb of Asâ-ânkh, a "smur wât, protector of the royal harbu and chief privy councillor of the king." The inscriptions on either side of the false door are duplicates of one another. The hieroglyphs are sunk and cut in full detail. The figures are in relief. The whole was at one time painted, but the only traces of colouring that remain are on the necklaces of the standing figures; these are black or dark blue. There are traces of red paint on the smooth stone below them. The spelling of the name Asâ is noticeable and differs from that on the similar stele figured in Mariette, Mastabas, p. 191. Very fine technique and workmanship. Vth dynasty. 10 ft. 6 in. x 5 ft. 5\(\frac{1}{2}\) in. From Saqqârah. [1383.]

PLATE XXV.

No. 98. Panel of hard yellow stone from the tomb of Erta-n-ânkh. The figure, table, and hieroglyphs are in sunk relief. Good workmanship. Vth or VIth dynasty. 8 in. x 11\(\frac{1}{2}\) in. From Saqqârah. [1429.]
No. 83. Part of the side of a false door of hard yellow stone from the tomb of Erta-n-ánkh, a privy councillor, "dresser of the king's wig," and overseer of the gold store. The figures and hieroglyphs are in sunk relief: the hieroglyphs in the small spaces, forming a list of funerary offerings, are incised. Good workmanship. Vth or VIth dynasty. 2 ft. 11 in. x 1 ft. 5 in. From Saḥkārah. [658.]

No. 98. Part of a false door of hard yellow stone from the same tomb. In this case the usual procedure is reversed and the funerary prayer is written down the centre while the panels on the right and left contain lists of offerings. The large hieroglyphs are in sunk relief, the small are incised. Vth or VIth dynasty. 1 ft. 9½ in. x 1 ft. 1½ in. From Saḥkārah. [1429.]

PLATE XXVI.

No. 61. Fine white limestone panel from the tomb of Khnum-betep, "chief of Nekheb," in the reign of Userkaf. The figure, table of cakes, and hieroglyphs are in sunk relief and coloured blue, yellow and red. The carving is very fine and the hieroglyphs are cut in exquisite detail. The prayer for clothing includes "thousands of leopard skins," the leopard determinative being a small masterpiece of animal draftsmanship. Vth dynasty. 2 ft. 5 in. x 2 ft. 2 in. From Saḥkārah. [1165.]

No. 51. Part of a false door from the tomb of the same, of smooth hard limestone. The hieroglyphs are in low relief and carved in exquisite detail. A few traces of red, yellow and blue paint remain. On the left-hand side are the civil offices held by the deceased, on the right the religious. Vth dynasty. 3 ft. 7 in. x 3 ft. From Saḥkārah. See Mariette, Mastabas, p. 312. [1143.]

PLATE XXVII.

No. 81. Yellow limestone stele in the form of a false door of Sennu and his family. The figures are in sunk relief and the hieroglyphs incised. The technique is poor and the workmanship rough. Probably Vth dynasty. 2 ft. 10 in. x 2 ft. 1 in. [1136.]

PLATE XXVIII.

No. 52. White limestone architrave from the tomb of Neka-ánkh, a priest connected with the cult of king Userkaf. The hieroglyphs and figure of the deceased are in sunk relief. Fine technique and workmanship. Vth dynasty. 1 ft. 6 in. x 12 ft. Published: Mariette, Mastabas, p. 311. From Saḥkārah. [1275.]

No. 58. Limestone fragment bearing a standing male figure and part of six lines of text. Both the figure and hieroglyphs are deeply sunk. Ancient Empire. 2 ft. 2 in. x 1 ft. 3 in. [1185.]

No. 68. Limestone block from the tomb of the princess Bunefer (?). The hieroglyphs are in relief and well carved. Ancient Empire. 1 ft. 10 in. x 2 ft. [1273.]

No. 69. Companion block to the foregoing with the same inscription. 1 ft. 10 in. x 2 ft. [1274.]

No. 84. Limestone stele of Uthenti ("The Libyan"?) surnamed Pená. The hieroglyphs are incised. The figure of the deceased is in low flat relief on a sunk ground: the long bow grasped in the left hand and the flint-headed arrow in the right are somewhat unusual. The whole stele appears to have been originally painted red. The technique and workmanship are rough. Vth or VIth dynasty. 1 ft. 3½ in. x 9½ in. [647.]
PLATE XXIX.

No. 64. Limestone stele of Tetâ. In the centre is a deep niche containing a statuette in three-quarter relief of the deceased. The body is painted red, the skirt white, and wig, eyebrows, lids and pupils black. The stele is unfinished. With the exception of the two bs' of the name Tetâ the hieroglyphs are only painted on the stone. There were painted texts on either side of the niche, but of these only two signs remain. The word Bânnu may possibly be part of deceased's name. Vth or VIth dynasty. 4 ft. 3 in. x 2 ft. 3 in. [1165.]

No. 60. Limestone relief of the lady Thethâ. Both figure and hieroglyphs are in low relief, boldly and well carved. Ancient Empire. 2 ft. 5 in. x 1 ft. 2 in. [1161.]

PLATE XXX.

No. 80. Limestone architrave on the exterior of the mastaba tomb of Ur-âri-en-Ptaḥ. The text and figures are boldly carved in low relief, the hieroglyphs being represented in full detail. VIth dynasty. 1 ft. 2 in. x 8 ft. 11 in. From Saâkârah. [718.]

No. 80. Limestone architrave of the interior of the mastaba tomb of Ur-âri-en-Ptaḥ. The hieroglyphs are in sunk relief, and are not cut with the detail and fineness which characterize the exterior architrave: they were originally filled in with paint, traces of which, in red and faded blue, remain. 1 ft. x 8 ft. 9 in. [718.]

PLATE XXXI.

No. 80. Limestone false door of the interior of the mastaba tomb of Ur-âri-en-Ptaḥ. The hieroglyphs are in sunk relief and somewhat carelessly cut: traces of blue and red paint remain. The signs of the centre panel, containing a list of offerings, are deeply incised and coloured a bluish-green. The figures are in low relief, and are painted a deep plum colour, which, in the case of the upper seated and the lower left-hand figures, has faded to a light red. Wigs and eyes black. Fair technique and workmanship. 6 ft. 10 in. x 2 ft. 4 in. [718.]

PLATE XXXII.

No. 80. Limestone false door of Ur-âri-en-Ptaḥ and his wife Khenti-kaus. The hieroglyphs are in sunk relief filled in with red, blue, and yellow paint, traces of which remain. The figures are in low relief; the male is coloured dark plum colour and the female yellow; the skirts are white and the wigs black. The figure at the foot of the right-hand column has never been finished, and is merely sketched on the stone in plum-coloured paint. 6 ft. 10 in. x 2 ft. 1 in. [718.]

PLATE XXXIII.

No. 82. Limestone stele, painted to represent a false door, from the tomb of Ptaḥ-betep. The hieroglyphs, figures, and decorations are in sunk relief, with the exception of the representation of the deceased seated at a table of offerings, which is in slightly raised relief. The door itself is pictured as fastened by two bars. The colouring is in good preservation. The whole surface of the stone is painted yellow, and the palm leaf cornice, the hieroglyphs, and the figures are filled in with blue, yellow and red. Good technique and workmanship. Probably VIth dynasty. 3 ft. 2½ in. x 2 ft. 8 in. From the necropolis of Memphis. [1287.]
DESCRIPTION OF THE PLATES.

No. 85. Limestone false door of Atu, a scribe, priest of Maat, and "overseer of the great house of six." The hieroglyphs and figures are in sunk relief. Three of the latter are conventional and three portray the deceased as bull-y and fat; two of these figures attempt a perspective view of chest and shoulders peculiar to this period (cf. Capart, Une Rue de Tombes). A band, probably of linen, is worn slung over the right shoulder and under the left arm. Indifferent workmanship. VIth dynasty. 4 ft. 10 in. x 3 ft. 6 in. From Sakkârah. [1191.]

PLATE XXXIV.

No. 76. Limestone stele in the form of a false door, from the tomb of Karta. The hieroglyphs and figures at the foot of the stele are in sunk relief; the scene representing the deceased seated at a table of offerings is in low relief. Indifferent technique and workmanship. The lower surface is badly weathered. VIth dynasty. 4 ft. 10 in. x 2 ft. 10 in. From the necropolis of Memphis. [1342.]

No. 75. Limestone stele in the form of a false door, from the tomb of Karta. It is possible that this stele may have been made late in his life, after he had attained to the dignity of royal chancellor and held numerous other offices. Probably at this time he added the king's names, Pepi-nefer and Meri-râ-nefer, to his own. Style and arrangement the same as the foregoing. Five of the figures wear bands of linen over the right shoulder, while four are represented with the shoulders in attempted perspective. VIth dynasty. 7 ft. x 4 ft. 3 in. From the necropolis of Memphis. [1341.]

PLATE XXXV.

Limestone lintel from the tomb of Karta. The centre portion is rounded and the ends were bonded into the masonry of the walls. The hieroglyphs are in sunk relief. VIth dynasty. 8 in. x 4 ft. 1 in. From the necropolis of Memphis. [1319.]

Limestone angle block, probably of the false door or entrance, from the tomb of Karta. In the front are part of four lines of hieroglyphs and a standing figure of the deceased in sunk relief. At the side are a line and part of a line of text also in sunk relief. Good workmanship. VIth dynasty. 3 ft. 4 in. x 1 ft. 5 in. [1319.]

Limestone angle block from the tomb of Karta. The front is arranged and inscribed in a manner similar to the foregoing, but the side contains only a single line of hieroglyphs, at the bottom of which is a small standing figure. Style, same as the above. VIth dynasty. 4 ft. x 1 ft. 4 1/2 in. [1319.]

PLATE XXXVI.

Limestone relief from the tomb of Karta. Both figures and hieroglyphs are in sunk relief. VIth dynasty. 3 ft. 10 in. x 4 ft. 1 in. [1319.]

PLATE XXXVII.

Part of two lines of inscription on limestone from the tomb of Karta. The hieroglyphs are in sunk relief and carved in detail. VIth dynasty. 4 ft. x 1 ft. 1 in. [1159.]

No. 88. Limestone stele of Behenu, the wife of Karta, in the form of a false door. Both figures and hieroglyphs are in low relief. Indifferent workmanship. VIth dynasty. 6 ft. 7 in. x 3 ft. 7 in. [1330.]

PLATE XXXVIII.

No. 74. Limestone stele bearing a decree of king Teta. The surface of the stone is very badly weathered and few signs remain distinctly legible. At the top may be read "the decree of the king"; reference is made to "gifts of produce" and to "wine, cattle, and labour therein."
The carrying out of the decree was apparently entrusted to the royal chancellor, Nekeku (?) Assā. At the bottom is part of a date, perhaps the month of Athyr. VIth dynasty. 4 ft. 7 in. × 1 ft. 11 in. (Published: Griffith, in Abydos, II, p. 41.) From Abydos.

*Presented by the Egypt Exploration Fund, 1903.*

**PLATE XXXIX.**

No. 91. Limestone panel from the tomb of Merer-aker. Both hieroglyphs and figure are in sunk relief. Fair technique and workmanship. VIth dynasty. 1 ft. 3 in. × 2 ft. 1 in. From Denderah.

*Presented by the Egypt Exploration Fund, 1898.*

No. 78. Limestone panel of Senefer-Seshem-Pepi, surnamed Sennā. Both hieroglyphs and figure are in sunk relief. The deceased is represented wearing a skirt with peculiar transverse ribbings and vertical piping. VIth dynasty. 1 ft. 5 in. × 1 ft. 8 in. From Denderah.

*Presented by the Egypt Exploration Fund, 1898.*

No. 92. Limestone panel of Menā, a royal chancellor, prince of the palace, and controller of the shipbuilding. Both figure and hieroglyphs are in relief on a sunk ground. Good technique and workmanship. VIth dynasty. 1 ft. 8 in. × 2 ft. 3 in. From Denderah.

*Presented by the Egypt Exploration Fund, 1898.*

**PLATE XL.**

Sandstone panel of Ani, a caravan leader (?). The deceased is represented seated at a table to the right of which is a list of ninety offerings. The larger hieroglyphs and the figure are in sunk relief. The hieroglyphs of the list of offerings are incised and have suffered much from weathering. Good workmanship. VIth dynasty.

*Presented by the Egypt Exploration Fund, 1898.*

**PLATE XLI.**

No. 89. Limestone stele, in the form of a false door, from the tomb of Pepi-set-heb. The hieroglyphs and figures are in sunk relief. Indifferent workmanship. VIth dynasty. 4 ft. 4 in. × 1 ft. 10 in.

No. 86. Limestone stele, inscribed with funerary prayers, and bearing a representation of a man and his son. The name of the former has been omitted. Both figures and hieroglyphs are in sunk relief. IVth–VIth dynasty. 3 ft. × 1 ft. 7 in.

**PLATE XLII.**

No. 97. Limestone cone of Sekherf. On two sides are representations of the deceased seated before a table of offerings and two short vertical lines of text. VIth (or possibly XXVIth) dynasty (?). 1 ft. 10 in. × 9 in.

**PLATE XLIII.**

No. 77. Limestone architrave on which are the winged solar disk and the prenomen and titles of Pepi II. The hieroglyphs are incised; there are traces of red paint on the solar disk. VIth dynasty. 10 in. × 4 ft. 10 in. From the Osiris temple at Abydos.

*Presented by the Egypt Exploration Fund, 1903.*
DESCRIPTION OF THE PLATES.

No. 71. Limestone slab on which are representations of offerings being made to a man and his wife by relatives. The surface of the stone is very much worn. The hieroglyphs are incised and the figures are in low relief. VIth dynasty (7). 1 ft. 4 in. × 1 ft. 10 in. [1186]

No. 206. Limestone architectural fragment inscribed “beloved of the great lady of Râ-Net.” On the right is part of a pilaster carved in high relief. Ancient Empire (?). 1 ft. × 9 in. [1149]

No. 90. Yellow limestone cornice cut to represent projecting beams of wood. On it is inscribed the word $\textit{apt.}$ VIth dynasty. 1 ft. 8 in. long. From Abadiyeh. [1293]

Presented by the Egypt Exploration Fund, 1899.

PLATE XLIV.

Limestone libation altar of $\textit{Sabu.}$ The hieroglyphs are incised. VIth dynasty. 9\frac{1}{2} in. × 1 ft. 1\frac{1}{2} in. [1487]

Limestone libation altar of the scribe and chief $\textit{hen-ka}$ priest . . . . . . . . . $\textit{phu.}$ The hieroglyphs are in sunk relief. VIth dynasty. 1 ft. 1\frac{1}{2} in. × 1 ft. 3\frac{1}{2} in. [1488]

No. 93. Limestone libation altar of the royal kinswoman and priestess of Hathor, $\textit{Antkas.}$ The hieroglyphs are incised. VIth dynasty. 8\frac{1}{2} in. × 11\frac{1}{2} in. [1175]

No. 94. Limestone libation altar of $\textit{Khart-Khennut.}$ The hieroglyphs are incised. VIth dynasty. 8\frac{1}{2} in. × 1 ft.

[1176]

PLATE XLV.

No. 79. Limestone stele in the form of a false door of $\textit{Peri,}$ a priest connected with the cult of Pepi II. The cornice is designed to represent palm foliage. The figures are in sunk relief and the hieroglyphs incised. Very poor workmanship. VIth dynasty. 2 ft. 2 in. × 1 ft. 5 in. [212]

No. 285. Limestone stele in the form of a false door of $\textit{Nebā.}$ The figures are in sunk relief and the hieroglyphs incised. The cornice is decorated with incised palm-leaf ornamentation and the stone framework bears a cut criss-cross design. The whole stele was at one time painted red. Very rough and clumsy workmanship. VIth–Xth dynasty. 2 ft. 1 in. × 1 ft. 2 in. [201]

PLATE XLVI.

No. 96. Upper part of the limestone funerary stele of $\textit{Rutch-āhau.}$ The scenes are divided into three registers. In the upper are a table symbolic of field-produce, a servant cutting meat, and various food offerings. The centre contains a scene representing the deceased and his wife receiving offerings and veneration from their family. Below is a pastoral scene showing the attendants milking cows and bringing grain, beer, etc. The scenes are in relief and admirably carved. The hieroglyphs are incised.

PLATE XLVII.

No. 96. Lower part of the same stele. The twelve lines of text form a funerary prayer the meaning of which is, for the most part, very obscure. There are several unknown signs. The hieroglyphs are in sunk relief. (N.B.—The stele is complete and has only been divided into two plates for convenience.) XIth dynasty. 5 ft. 2 in. × 3 ft. 2 in. [159]
PLATE XLVIII.

No. 135. Fine white limestone panel from the tomb of Antef-äker. The hieroglyphs are in sunk relief. Fine workmanship. XIth dynasty. From Denderah. 1 ft. 3 in. x 3 ft. 8 in.

Presented by the Egypt Exploration Fund, 1898.

No. 119. Part of a red sandstone panel with a list of offerings dedicated to the image of the deceased king Neb-hapet-râ Mentu-hêtep. The hieroglyphs and representations are in sunk relief. XIth dynasty. From Abydos. 1 ft. 3 in. x 3 ft. 4 in.

Presented by the Egypt Exploration Fund, 1903.

PLATE XLIX.

No. 100. Fine white limestone stele of Thethâ, an official of king Uah-ânkh Antef and his successor, Nekht-neb-tep-nefer Antef. The biographical portion of the stele is a noteworthy contribution to the history of the XIth dynasty. It mentions the important fact, hitherto unnoticed, that in the reign of the first-named king the Theban kingdom extended from Elephantine to Thinis. The reading of the sign designating the former city is made certain by the fuller orthography found on Stele No. 20543, l. 10, of the Cairo catalogue (see Lange and Schäfer, Grab- und Denkäste des mittleren Reichs, II, p. 165. Also Denderah, Plate XV). The text further speaks of the king's anxiety at the encroachment of foreign desert tribes and his satisfaction at the tribute levied on their chiefs by Thethâ and brought to his majesty. Thethâ was entrusted with the construction of the king's barge, and also of a great boat for his city. He states that under Nekht-neb-tep-nefer, the successor of Uah-ânkh, he enjoyed the same favour and power. The hieroglyphs are in sunk relief and admirably clear.

PLATE L.

No. 100. Lower part of the same stele, containing funerary prayer, list of offerings, and large figure of Thethâ himself, with his seal-bearer and an attendant. The hieroglyphs are in sunk relief, the figures and representations of offerings in low relief. The technique and workmanship are extraordinarily fine: there are no traces of paint. (N.B.—The stele is complete, and has only been divided into two plates for convenience.) XIth dynasty. Published: Breasted and Pier, American Journal of Semitic Languages, Vol. XXI, p. 159. 4 ft. 11 in. x 3 ft. 6 in. From Karnak.

[614.]  

PLATE LI.

No. 103. Fine white limestone jamb from the tomb of Thethâ. Similar style and technique. 2 ft. 9 in. x 11½ in.

No. 102. Fine white limestone jamb from the same tomb. The figures and hieroglyphs are in sunk relief. The same fine style and technique are maintained. The son, represented by the lowest figure, acts as a shabti. 4 ft. 10 in. x 1 ft.

PLATE LII.

No. 101. Fine white limestone architrave from the tomb of Thethâ. The hieroglyphs are in sunk relief and beautifully cut. 4 ft. 3½ in. long.

Fine white limestone stele of Sen-bennu. The hieroglyphs and figures are in sunk relief. The former present some peculiar orthographical forms. The latter are similar in style to the figures on the stele of Kaur Antef (see following plate), especially in their treatment of the limbs; the flesh is coloured red and the wigs black. Rough workmanship. XIth dynasty. 1 ft. 10 in. x 3 ft. 6 in.

[1486.]
PLATE LIII.

No. 99. Painted limestone stele of Kaur Antef, a contemporary of kings Uah-ankh Antef-aa, Nebkhen-tep-nefer Antef, and Sankhk-ab-taui Menthen-hetep. The stele is noteworthy, not only by reason of the crude colouring and peculiar cutting of the figures, but also for the unusual orthography employed. It differs in a remarkable manner from the contemporary stele of Thetha, both in regard to style and epigraphy. The figures are in sharp relief and the hieroglyphs incised: the latter are coloured red and dark blue. The wigs of the figures were once black and the bodies red, but the paint has faded considerably. The deceased apparently held office in Thebes. The inscription contains mention of a “fourteenth year.” The peculiar sign at the end of each royal name, and of the name of each wife, must be equivalent to maa-kheru, although it occurs on the first vertical column of text on the right after the word khenbitu. There are several other unknown signs. XIth dynasty. 2 ft. 3 in. x 3 ft. 3 in.

PLATE LIV.

No. 120. Painted limestone stele of Sebekaa, surnamed Aa. The unusual technique is similar to that of the foregoing stele of Kaur Antef: the figures are in sharp relief and painted red with the exception of the two female figures immediately behind Sebekaa in the lower register, which are painted yellow, while the hieroglyphs are incised and filled in with blue paint. The biography of the deceased is of little interest, but the scene in the second register is noteworthy: on the left the deceased is seen lying on his bier, being revisited by his Aa, who is represented as a diminutive human being breathing “life” into Sebekaa’s nostrils; on the right women make dough and two men feed a fire, which is a faithful representation, not of a real fire, but of the model fires made at this period. The lower portions of the trunks of all the male figures have been purposely mutilated. The workmanship is rough but the animals are cleverly depicted. The peculiar technique of this and the two preceding stelae may be compared with No. 20011 on Plate II of Grab- und Denksteine des mittleren Reichs. XIth dynasty. 2 ft. x 1 ft. 10 in.

PLATE LV.

No. 134. Fine white limestone stele of Antef, son of Mait. The large standing figure of the deceased and the table, symbolic of field-produce, are in low relief. The hieroglyphs themselves are clear, but the meaning of the text is obscure. Style and technique good: somewhat similar to that of Thetha. Probably XIth dynasty. 2 ft. 6¾ in. x 3 ft. 10 in.

PLATE LVI.

No. 130. Limestone stele of Aker and his relatives. This is a good example of a “family” funerary stele, on which as many kinsfolk as possible are commemorated. The figures and objects in the top register are in low relief and coloured red. All the other figures are in sunk relief and the hieroglyphs are incised. The colouring of the greater part of the stele has disappeared, but the background was probably yellow. Good style and workmanship. Probably XIth dynasty. 2 ft. 7 in. x 1 ft. 7 in.
